DELFIN CHANGELOG VERSION 8.97

Release Date: 24/03/2021

CHANGES FROM VERSION 8.96

Updates:

- \approx Fixed an issue where a user can add an affordability item with no description.
- \approx Fixed an issue where a user can delete a nationality in the setup if it is linked to a client.
- ≈ Fixed an issue where a user could not delete an insurance type after it was created in the setup.
- ≈ Fixed an issue when granting or revoking all permissions with the icons (\u00e4 \u00e4) on a user, not all permissions was granted or revoked.
- \approx Fixed an issue which allowed the creation of a loan purpose without a description in the setup.
- ≈ Fixed an error message that was returned when sending an email from the Dokuments tab on a client's profile and there is no email configuration for the branch in the setup.
- ≈ Fixed an issue on the Local PC Setup & Setup permissions for printers, where the system loaded the Printer tab first if the user did not have Setup permissions for it.
- \approx Modified the NuPay's DebiCheck registration call to include the employer code.
- \approx Modified the Paypoint Transaction Grid report to include sub totals for groups.
- ≈ Modified the Loan Status report to enable the selection of all statuses if the use of loan status is deactivated in the setup.
- \approx Modified certain Insurance integration functions to use TLS 1.2.
- ≈ Modified procedures for the Form 39 on the number (count) of applications rejected for HDP's on the Summary, Unsecured and Short-Term pages accordingly.
- $\approx~$ Modified the procedure to check for the maximum capital limit to allow the creation of a R100,000,000.00 loan.

New Features in 8.97

DebiCheck Permissions

Added permissions for DebiCheck TT1 transactions to the current Loan type permission set "Status" and renamed the label to "Status and DebiCheck loans", as per figure below:

Status and DebiCheck loans	
Decline	×
Approve	×
Payout	×

Standard loan statuses and DebiCheck loans will now use the loan type permissions set per user.

Page | 1

So NuPay DebiCheck TT1 Realtime

Added the functionality to create a NuPay DebiCheck TT1 Realtime contract ,which will follow the standard NuPay TT1 Realtime processes on initiation and the loan status process in Delfin. The following additions and changes were made:

- The repayment method "NuPay TT1 Delayed" has been renamed to "NuPay TT1". Both Delayed and Realtime transactions will be recorded on the "NuPay TT1" repayment type.
- A setup setting was added to the CPRAS Setup (Setup > Integration > CPRAS Setup) with label: "TT1 default auth type". This will enable a user to select a default authentication type for new contract registrations, as per figure below:

Signature pad setup SMS portal VOIP portal CPRAS Setup	CPRAS 2 Settings Server: https://cpras24est.webfin.co.za/ Active Username: 1111-1234 Password: ******* Active collection systems: NUPAY.TT1
1	Active disbursement systems: ALLPS.FEZA TT1 default auth type: Delayed Delayed Realtime

The "TT1 default auth type" will default to "Delayed" on update

The authentication type can also be selected during the contract registration process. A dropdown menu has been added with label "Auth Type" to allow the user to select the authentication type, as per figure below:

Click on the Cancel button to cancel the creation of this loan. Click on the OK button to continue creating this loan.								
Required Action								
Register no	w							
Register lat	er							
Never register								
Banking Deta	ils							
Bank name:	FIRST NATIONAL BANK					•		
Branch code:	200106 -	Branch name:	CALVINIA, C.P.			•

- Rejected Authorisation
- Inactive
- Suspended
- All
- NuPay DebiCheck Settlement Report

Types:

- TT1 Will display all transactions for Debicheck (TT1 & TT3)
- TT3 Will display all transactions for Debicheck (TT1 & TT3)

Filters:

• From and To Date

Settlement Token Additions

Added a new Settlement letter token that can be inserted and used on any document in the Document manager, with label: "Settlement balance including expected late fees"

Token label when displayed on Document:

[Settlement Letter.settlement_current_loan_incl_late_fees]

Calculation:

This token will calculate a **single loan's settlement balance** as it would be for **5 days** in the **future** from today's date and include the late interest and late service fee due amounts, as it would be on **month end**.

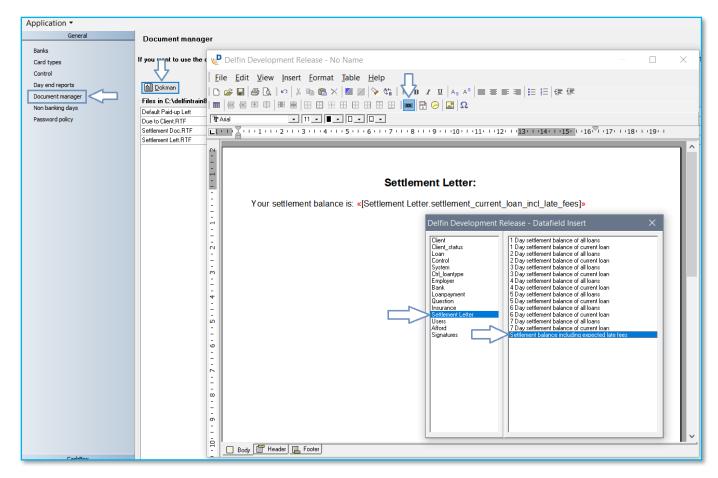

The late fees will **only be added** if there are any **instalments overdue** on **today's** date. In addition, if the 5 days in future stretches over to the next month, then the late fees due amounts will be calculated as it would be for **the next month end**.

Adding Token:

You can add the token @ Setup > General > Document Manager > New/ Edit Document > Click on data field icon () > Settlement Letter > Settlement balance including expected late fees:
